

Title: *A Wolf Called Wander*

Author: Rosanne Parry

Review by: R. Patel

*A Wolf Called Wander* by Rosanne Parry is about the difficulties of living as a wolf. This story is written from the perspective of a wolf that's named Swift. He is the fastest in his family and no one has ever been able to run faster than him in their family. He faces lots of difficulties when he is forced to run away from his family. He ran many miles away from home but when faced with the decision of going back, fear ultimately takes the decision for him and he keeps on running. Many difficulties are presented to him such as food, water, and family which makes it difficult for him on this arduous trip.

This story was astounding due to its perspective, characters, and more. The perspective of this story was told from the main character in first person. This was told by a wolf so all the descriptions had to be told differently and the author did so well at showing that. It was so well detailed that you could make out a clear picture of the setting in your head. The main character, Swift, was such a caring character but yet so ruthless when it came to getting what he wanted. He didn't have many fears and was always ready to try something new. I personally, would recommend this book to anyone who likes to read new and interesting topics.
