

The background features a soft, warm color palette of light pinks, peaches, and oranges. Large, flowing, abstract shapes in these colors are scattered across the page. In the top-left and bottom-right corners, there are stylized illustrations of leafy branches in a reddish-orange hue. The overall aesthetic is clean, modern, and inviting.

# Customization

By: Laura Zeng

# INTRODUCTION

What is customization? It is transforming something into your style. For example, you can take an old flower vase and design it to your liking. You can paint it, add texture, and more. You can use the customized objects as room decor, to make any room, your style. This activity is also great to do with your family and friends, so follow the tutorial below!

# NUMBER #1

- **Finding an object to customize:**
  - Has smooth surfaces all around (no textured surfaces)
  - It's best for the base color to be a light color so that it is easy to cover up with white paint
  - If you are using paint to customize, make sure the surface you are painting on will be able to stick to paint
  - Do not use cups or dishes, unless you are customizing for decoration. If you are using a material with chemicals like paint, it might not be safe

Here are some ideas  
you can use →

# NUMBER #2

Here are some materials you can use to customize your object!

- **Materials**
  - Stickers
  - Paint
  - Pom poms (to add texture)
  - Glitter
  - Markers
  - Construction paper
  - Glue
  - Tape
  - Scissors

# NUMBER #3

## Design

- Now you can start designing/customizing!

### Ideas:

- You can paint flowers, polka dots, a cartoon character, and more
- Use glitter to make your object SHINE, it can make whatever you are customizing, unique, and interesting
- Draw something on your object, and color it in with markers, paint, or any other materials you need
- Here are some ideas below
